Abstract (en)
[origin: WO2014013321A1] The invention relates to a system for fixing a radiator to a wall, characterized by having a plurality of differently designed lower parts (4; 4') and upper parts (5; 5') for maintaining a radiator. The lower parts (4; 4') and upper parts (5; 5') are designed so that they can be combined together in a modular manner to form a support rail (1; 1'). In certain uses, the support rail (1; 1') comprises one of the lower parts (4) and one of the upper parts (5) and extends vertically.
