Abstract (en)

[origin: WO2014016192A1] The invention relates to a heat exchanger (10) for a motor vehicle, comprising a casing (12) housing the exchange elements (14), one end of said casing being equipped with an attachment flange (18). The flange (18) comprises a surface which is in contact with a member of the engine and which is equipped with screw holes. Another surface of the flange (18), known as the inner surface, comprises a peripheral brazing projection (40). The invention also relates to a method for brazing such a heat exchanger (10).
