Abstract (en)  
[origin: WO2014015857A1] The invention relates to protection equipment (10) for protecting a target (1) against attacking missiles, with a plurality of protection elements (11, 12) which are triggerable individually in order to combat a missile, wherein the protection elements (11, 12) are arranged in such a manner that a triggered protection element (11) is replaced by a replacement protection element (12) arranged redundantly in relation to the latter. The invention furthermore relates to a vehicle (1) with protection equipment (10) and to a method for protecting a target (1) against attacking missiles.
