Abstract (en)

[origin: EP2878654A1] The present invention provides a poly(meth)acrylate-based viscosity index improver comprising a polymer chain comprising a structural unit represented by the following formula (1) and a structural unit represented by the following formula (2), wherein Mw is 100000 or more, and Mw/Mn, is 1.6 or less. [R 1 represents hydrogen or a methyl group, and R 2 represents a group represented by the following formula (3), and R 3 represents a C1 to C18 alkyl group that is straight-chain or has a branch having 5 or less carbon atoms. m and n are integers which satisfy m #¥ 5, n #¥ 4, and m + n #¤ 31.]
