Abstract (en)

[origin: US2015153137A1] A fire control sight for a hand-held firearm includes a sight housing, a front sight, and a sight guide having two sight guide side pieces with a plurality of sight crosspieces forming rear sights. The fire control sight also includes a range finder, at least one inertial sensor and/or a magnetic field sensor, a control computer, and a display device for displaying an optimal orientation of the barrel axis of the hand-held firearm determined by the control computer.
