Abstract (en)  
[origin: CA2880748A1] The invention relates to a disintegrating device, comprising a machine housing (6), which can be installed on an installation plane or an installation surface (A), and at least one disintegrating roller (7). The disintegrating rollers is rotatably supported in the machine housing (6) and has at least one disintegrating tool (71) arranged thereon, at least one counter blade (42), which interacts with the disintegrating tool (71), and at least one comb carrier (4) on at least one wall (61) of the machine frame (6) extending parallel to the axis of rotation (72) of the disintegrating roller (7). The invention is characterized in that at least part of the wall (61) of the machine housing (6) forms a common, in particular pivotable assembly (B) together with the comb carrier (4).
