Abstract (en)

[origin: WO2014020254A1] The invention concerns a cleaning device for a gun having a fluid inlet, an outlet for said fluid, a gas inlet and an outlet for said gas. Said cleaning device comprises a support frame, a fluid supply head carried by said frame and connectable to said paint inlet of the gun, and a system (14) for receiving fluid which comprises a receiving nozzle (15) having a fluid channel (150) of which the inlet (151) can be connected with the fluid spray outlet (29) of the gun, and a gas discharge pipe (47) of which the inlet can be connected with the gas outlet of said gun. Said nozzle (15) is mounted movable relative to the frame, in a direction parallel to the axis of the inlet (151) of the fluid channel (150) of the receiving nozzle (15), between a close position of the supply head (3) and a separated position of said supply head (3).
