Abstract (en)

[origin: WO2014020550A1] THIS invention relates to a propeller and more particularly but not exclusively, to a propeller for use with inboard and outboard boat engines. The propeller includes a hub, and a plurality of blades, each blade having a blade face, a blade back and a blade peripheral zone comprising a leading edge, a trailing edge and a blade tip zone extending between the leading edge and the trailing edge. The propeller is characterized in that a flow guide is provided on the blade back of each blade.
