Abstract (en)
[origin: WO2014019642A1] The invention relates to a filling element of a filling system or of a filling machine for filling cans or similar containers (2) with liquid contents, comprising a filling element housing (6) which has at least one dispensing opening (8) on a housing portion (6.1) for dispensing the contents into the respective container in a controlled manner, comprising a sealing tulip (13) which can be moved relative to the housing portion (6.1) in a filling element axis (FA) between a raised position and a lowered position so as to seal against an opening edge (2.1) of the container (2), and comprising sealing means (16) for sealing the transition between the sealing tulip (13) and the filling element housing (6).
