Abstract (en)

[origin: WO2014019715A1] The invention relates to a package (1) comprising water-soluble film pouches (3) filled with liquid washing or cleaning composition (2), wherein the water-soluble film pouches (3) are formed wholly or partly from PVA copolymers and the water-soluble film pouch (3) and/or the washing and cleaning composition formulation comprises a source of at least one amine compound, at least one fragrance emission source (4) disposed within the package releases fragrances having a boiling point of $>70^{\circ}\text{C}$, and at least one ventilation orifice (5) provided in the package (1) has, in terms of magnitude, a ventilation orifice area/boiling point ratio, based on amine compounds, between $0.8\text{-}50\text{ mm}^2/^{\circ}\text{C}$, preferably between $1\text{-}20\text{ mm}^2/^{\circ}\text{C}$, especially preferably between $1.1\text{-}10\text{ mm}^2/^{\circ}\text{C}$.
