Abstract (en)

[origin: EP2692843A1] The invention relates to the use of a chelating agent containing a starch hydrolysate that has been selectively oxidised at the C1 location as enzyme-stabilizing agent in a detergent composition. The invention further relates to an enzyme-containing detergent composition, containing a starch hydrolysate that has been selectively oxidised at the C1 location, and at most 1 wt.% of further chelating agents and/or further enzyme-stabilizing agents.
