Abstract (en)
[origin: WO2014019749A1] The arrangement relates to a floor-profile arrangement for bridging a gap between adjacent floor coverings, having a base profile and a covering profile, and having an intermediate profile, which can be tilted in relation to the base profile and has a first fastening portion, for fastening on the covering profile, and a second fastening portion, for fastening on the base profile, wherein at least one transversally extending wing is formed on the intermediate profile, between the first fastening portion and the second fastening portion.
