Abstract (en)

[origin: WO2014023298A1] The invention relates to a device for cocking a weapon (11), particularly an automatic weapon, with an axially movable actuating element (2) which can be coupled to a weapon-side cocking element (11.1) in order to cock the weapon (11), wherein a control device (3), via which the actuation element (2) is actuated to secure and release the weapon (11), can be coupled to a weapon-side securing element (11.2). The invention further concerns a weapon station with a weapon (11) and a cocking device, and also a method for operating a weapon (11) which can be cocked via a cocking device (1).
