Abstract (en)

[origin: WO2014095114A1] The invention relates to an electromagnetic contactor, comprising fixed and movable contacts, which are fixed on a contact carrier, which is coupled to a movable armature, which is arranged opposite a yoke, wherein an armature restoring spring and a magnetic coil (2) are arranged between the armature and the yoke. The invention is characterized in that a switch (3) having a switching element (6) is arranged before the magnetic coil (2).
