Abstract (en)  
A ski boot (1) comprising a rigid shell (2) which is shaped so as to accommodate the foot of the user and has a lower part structured so to couple/bind in a rigid and stable, though easily releasable, manner to a ski binding device, and a rigid cuff (3) which is shaped so as to enclose the ankle of the user and is hinged on the shell (2) so as to be able to rotate about a rotation axis (R) substantially perpendicular to the midplane of the boot (P) and locally substantially coincident with the articulation axis of the ankle of the user; the lower part of the shell (2) incorporating the front sole (11) being shaped substantially like the bowl of a spoon, so as to define a front ground-resting surface (18) with an arched profile at least orthogonally to the midplane of the boot (P).
