Abstract (en)

[origin: CN104692310A] The invention relates to a filling body (1) for filling a container with a product. The filling body comprises a filling valve (3) controlled by a lifting transmission device (2) and used for metering injection of a filling product into an outflux (12) of the filling product of a container to be filled, and a cleaning cover (4) used for sealing a closed outflux (12) of the filling product for cleaning the filling body (1). The cleaning cover (4) is pressed onto the closed outflux (12) of the tubular product by means of the lifting transmission device (2) of the filling valve (3).
