Abstract (en)

[origin: EP2881451A1] The invention relates to a reactor for obtaining gas from biomass or organic residues and to a method for obtaining gas in said reactor in which the process is produced in a single rotatory horizontal reactor, wherein the stages occur in internal sections separated by helical spirals and, by analysing the synthesis gases by means of a gas chromatograph positioned at the output of the reactor, it is possible to vary the method parameters.
