Abstract (en)
A clothes dryer according to the present invention includes a drying chamber, a loading port through which clothes are loaded into and removed, a door that closes the loading port, and lint filter (510) that is detachably attached to the door. Door (120) includes accommodating unit (121) that is opposed to the loading port and that accommodates lint filter (510), and lint filter (510) includes filter unit (511) and frame (512). Door (120) closes the loading port in a state where upper end (121a) of accommodating unit (121) of door (120) and upper end (512a) of frame (512) of lint filter (510) are substantially in alignment with each other. This structure securely accommodates detachable lint filter (510) into door (120).
