Abstract (en)

[origin: EP2883990A1] The present invention has a selection button for an operation course for determining operating conditions for washing and drying, a liquid crystal panel for displaying a setting button and setting conditions for wash, rinse, and spin, and a transparent panel having a transparent electrode, the transparent panel being superposed on the liquid crystal panel. A touch panel is also provided for performing operation by the touch of a finger to the transparent panel, and a description display screen (71) for describing the details of operation courses is provided to the touch panel. A course setting button (67) for causing the liquid crystal panel to display the setting conditions and the setting buttons is further provided to the description display screen (71).
