Abstract (en)

[origin: EP2884016A1] The invention relates to a drain, comprising: - a collecting housing with an inflow opening on the upper side, an outflow opening and a tunnel extending to the outflow opening, wherein the outflow opening debouches in the tunnel; - a siphon cover arranged over the outflow opening, wherein during use the edge of the siphon cover is located lower than the outflow opening; and - a bridge part hanging over the tunnel and having a first end arranged on the outer side of the siphon cover, wherein the other end of the bridge part further lies sealingly against the inner wall of the collecting housing.
