Abstract (en)

[origin: WO2014026788A1] The invention relates to an actuator device comprising at least one actuator piston (2), with which two springs (11,12) are associated, said device being coupled to an adjustment device. The adjustment device is designed as a pivoting adjustment device (4) with a centering system. An axial piston machine comprising a swashplate is also disclosed. The swashplate can be adjusted by means of a control valve comprising an actuator device of this type.
