Abstract (en)
[origin: WO2014026676A1] Disclosed and described is a device for coupling an attachment (2), in particular a dozer blade, mine roller or mine plough, to a vehicle (3), comprising a pin (6), a pin receptacle (4) which receives the pin, and an explosive device (5) for emergency decoupling. In order to guarantee durable and reliable emergency decoupling of an attachment from a vehicle, the pin for releasing the coupling can be pushed out of the pin receptacle by means of the explosive device.
