Abstract (en)
[origin: WO2014048716A1] The invention relates to a disconnecting assembly (10) for a high-voltage direct-current network, having a first disconnecting device (12), which comprises a first semiconductor switching unit (16), and a second disconnecting device (14), which is connected parallel to the first disconnecting device (12) and which comprises a first mechanical switching unit (18) and an auxiliary switching device (20) connected in series with the first mechanical switching unit (18), wherein the auxiliary switching device (20) comprises a second semiconductor switching unit (22) and wherein the auxiliary switching device (20) comprises a second mechanical switching unit (24), which is connected parallel to the second semiconductor switching unit (22).
