Abstract (en)

[origin: CN104720098A] The invention relates to a machine for producing rod-shaped products from the tobacco manufacturing industry. The machine comprises a conveying device used for conveying continuous strips and a cutting device used for cutting the strips into the rod-shaped products with the predetermined lengths. The cutting device is provided with a cutter rest roller (1) capable of being rotatably driven. The cutter rest roller is provided with at least one cutter (3,4), which is radially outwardly protruded, and is replaceable. A cover part (2) used for the cutting device is disposed on the peripheral area of the cutter rest roller (1). One or a plurality of cutters (3,4) can be disposed in the cutter rest roller (1) by a locking device (22) operated by the cover part (2) or can be unlocked.
