Abstract (en)

The invention relates to a carrier element (20) for a wiper linkage (100) of a wiper system for cleaning a vehicle windscreen, comprising a pin-shaped fastening section (25) on the outer circumference whereof a tubular section (26) of a transmission element (28) can be slid and can be fixed on the fastening section (25) by means of a press connection, wherein the tubular section (26) can be pressed into at least one recess (30) of the fastening section (25). According to the invention, it is provided that the carrier element (20) has at least one additional retaining region (41) which is configured to receive bending forces acting on the transmission element (28) and introduce them into the carrier element (20).
