Abstract (en)

[origin: WO2014029796A2] The invention relates to a hand-held tool (1) for driving fixing elements (3) into a base (6), said tool having an initiating device (20), the actuation of which initiates a drive-in action and which can be blocked, depending on at least one state of the tool. In order to further simplify or improve the operation of the hand-held tool, a lifting magnet (24) is associated with the initiating device (20), with which lifting magnet (24) the actuation of the initiating device (20) can be blocked or enabled.
