Abstract (en)
[origin: WO2014029037A1] The invention relates to swivel-out steps (3) mounted beneath the platform (1), the steps being characterised in that the step treads (4a, 4b) remain horizontally in a stable position by means of a parallelogram as the steps (3) are swivelled out and the lowest step tread (4a) forms a cover, optionally also comprises a flow member and, once the steps have been swivelled out, forms a means for entering and exiting water, is a seat, acts as a trimming and damping means and, when the swivel arms (5a, 5b) are additionally swivelled out, forms an additional platform. The swivel ladder (33) consists of ladder elements (33a, 33b) and is collapsible by means of a cam (35) and a bracket (34), and the steps (3) and the swivel ladder (33) as stairway (3, 33) can have a hand rail that swivels out manually or automatically.
