Abstract (en)
[origin: WO2014028955A1] The invention relates to a lighting module (10) for a motor vehicle or for a motor vehicle headlight, said lighting module (10) comprising: -) a heat sink (6); -) a base (3) for at least one light source (2); and -) at least one light source (2) arranged on the base (3). The base (3) is fixed on the heat sink (6), said base (3) having one or more reference positions (4) for referencing a light-shaping body, in order to reference a reflector (1) for example, and the light-shaping body has a mounting base (1'), by means of which the light-shaping body can be referenced at the at least one reference position (4) of the base (3). According to the invention, the mounting base (1') is associated with at least one restoring element (7), by means of which the position of the mounting base (1') can be at least temporarily fixed in relation to the base (3).
