Abstract (en)

[origin: WO2014032958A1] The invention relates to a vapour extractor device (1) comprising a vapour extractor hood (7) that can be retracted and extended by means of a drive motor (9). It is considered advantageous for the vapour extractor device (1) to be configured to reduce a retraction speed from a first predetermined retraction position (P1), during a retraction of the vapour extractor hood (7). The invention also relates to a cooking appliance (5) which comprises a vapour extractor device (1).
