Abstract (en)

[origin: WO2014015356A2] The invention relates to an air guiding device (1) for suspending on a tilted or opened window or door, having an air channel (6) that is bounded by air channel walls (7 to 11). An inlet opening (12) opens into the air channel (6), from which an outlet opening (13) leads out. Viewed in longitudinal section, the longitudinal course of the air channel (6) is curved substantially in an arched shape.
