Abstract (en)  
[origin: WO2014029965A1] There is disclosed a television receiver, and corresponding methods, arranged to present television programs and a user interface to a user. The user interface comprises a plurality of interactive interface subsections, each interface subsection providing an interactive interface to a corresponding grouping of said television programs, and a home interface display comprising a home menu interface element enabling the user to select any one of the interface subsections, and enabling the user to instruct transition from the home interface display to the selected interface subsection. The home interface display further comprises an interactive preview interface presented to the user at the same time as the home interface display, the preview interface element providing an interactive interface to a subset of the grouping of television programs corresponding to the selected interface subsection.
