Abstract (en)  
[origin: CN204519694U] The utility model relates to a hairdressing equipment (1), hairdressing equipment includes steerable first subassembly (2) and second subassembly (3), first subassembly (2) can be during the hair be handled with second subassembly (3) cooperation is used for the processing of hair, said second subassembly with first subassembly (2) the separation and through first wired connection component (19) and first subassembly is connected, second subassembly (3) are including being used for the storage at least the storage device of first wired connection component (19) and second wired connection component (20), second wired connection component be used for with the second subassembly is connected with the power.

Abstract (fr)  
L'invention concerne un appareil de coiffure (1) comportant un premier module (2) manipulable qui est apte à coopérer pour et pendant un traitement de cheveux avec un deuxième module (3) déporté dudit premier module (2) et relié à ce dernier par un premier élément de liaison filaire (19), le deuxième module (3) comportant un dispositif de stockage (4) d'au moins ledit premier élément de liaison filaire (19) et d'un deuxième élément de liaison filaire (20) qui est destiné à raccorder ledit deuxième module à une source d'énergie électrique.
