Abstract (en)
[origin: CN203662125U] The utility model discloses a detachable belt fastener used for a handheld electric tool. The detachable belt fastener comprises a fastener foot and a fastener body which are integrally formed. The fastener foot is used for being connected with a belt, and the fastener body is used for being connected with the electric tool. The fastener body is matched with clamping grooves formed in the two sides of the tail end of a shell of the electric tool. A hook-shaped tongue is formed on the fastener body, and at least one fastener body groove is formed in the fastener body. The hook-shaped tongue and the fastener body groove are matched with grooves of the clamping grooves in the two sides of the tail end of the shell of the electric tool. By means of the detachable belt fastener, the handheld electric tool can be fastened to the left side or right side of the waist of a human body, and fast disassembly can be achieved without adopting external tools.
