Abstract (en)
[origin: WO2014035352A1] The present invention relates to a positioner (1) comprising flanges (2) which move in a synchronized manner with the robot in the robotic systems, and which hold the fixture (4) to be processed and put it into the desired position; and angular wings (3) moving the said flanges (2) in a way that there will be a certain angle (?) between them and the positioner (1) axis (p).
