Abstract (en)
[origin: WO2014033380A1] The invention relates to a vehicle information display system (1) comprising: a screen (3), a device for determining the addition of propulsion energy (4) to the vehicle, and a distance travelled counter (5). The system is characterised in that it is configured to automatically reset the counter (5) to zero when propulsion energy is added to the vehicle and to display the distance travelled following the replenishment of propulsion energy.
