Abstract (en)
[origin: WO2014033271A1] The invention relates to a box for the packaging and/or dispensing of products. The box comprises an internal space defined by an upper face (6), a lower face (7), a front side face (10), a rear side face (11), a right-hand side face (8) and a left-hand side face (9). At least one of the side faces is hinged at a hinge edge to one edge of the lower face, such that it can pivot about a pivot axis defined by the hinge edge. The box also comprises a cover hinged to one edge of the upper face of the box, such that it can pivot about the pivot axis contained in the cover. The cover can pivot between a lowered position, in which the upper face of the box is covered by the cover, and a raised position. The invention also relates to a folding decorative element and a blank for forming the box.
