Abstract (en)

[origin: WO2014032864A1] The invention relates to a slide chair for a rail switch. The slide chair comprises a base plate by means of which the slide chair is or can be fastened, and a slide chair plate which is or can be firmly connected to the base plate. The base plate has a heating fluid guide channel. The invention further relates to a rail switch having at least one such slide chair and a heating device for a rail switch.
