Abstract (en)  
[origin: CA2892337A1] The invention relates, inter alia, to a carriage body part (10), particularly a carriage body part on a rail vehicle in the form of an extrusion moulded part (11) with at least one fastening section (110) which is suitable for fastening an item of equipment (30), and extends in the extrusion direction (S) of the extrusion moulded part (11). According to the invention, the extrusion moulded part (11) is locally weakened by mechanical treatment and the fastening section (110) is resilient as a result of local weakening and forms a resilient fastening section (110).
