Abstract (en)

[origin: WO2014037612A1] A method for the installation of equipment (8, 9, 10, 25) aboard a ship, said method comprising constructing first a framework (2, 22) for a module (1, 21) for mounting thereon the machines and devices of an equipment unit, and said method comprising moving a prefabricated module aboard a ship into a space allocated for the module, whereby, as the prefabricated module (1, 21) is being delivered onto a ship, the module framework (2, 22) has its lowest section components (6, 16, 27) dismantled for setting a lowermost equipment unit (10, 25) of the module in suspension from a remaining framework of the module, and that the placing and securing of a module aboard a ship is followed by removing at least some of vertically extending components (7, 1 1, 26) of the module framework. The invention relates also to such a module (1, 21).
