Abstract (en)

[origin: WO2014037503A1] The invention relates to a compensating device (1) for fluctuating transport speeds of a fibre nonwoven (3). The compensating device (1) has a buffer belt (2) driven in a loop with three or four or more deflection points (12, 13, 14, 15, 16) and with a variable sag (11) of the carrying run supporting the fibre nonwoven (3). The compensating device (1) further comprises an adjusting element (19) for adjusting the location of at least one deflecting point (15, 16).
