Abstract (en)
[origin: WO2014036580A1] The invention relates to an in situ concrete safety barrier (1) comprising an in situ concrete body (2) provided with an essentially continuous reinforcement (5), at least one groove (4) extending essentially perpendicular to the longitudinal extension of the in situ concrete safety barrier (1) is arranged on a surface (3) of the in situ concrete body (2). According to the invention, at least one reinforcement reinforcing part (6) is arranged in the in situ concrete body (2) in the region of the at least one groove (4).
