Abstract (en)
[origin: CA2884140A1] The invention relates to a bullet (10) for shooting range and practice cartridges having a cylindrical rear part (1) and an ogive region at the nose end (2), wherein the ogive region (2) has a rear end (8) and a bullet tip (7). In order that in the soft target the bullet behaves like a conventional full metal jacket round nose bullet and moreover has a low energy output in the soft target, no deformation and no splinter formation and no puncturing effect occurs in protective materials of bullet catchers, according to the invention the bullet (10) is constructed in one piece, the ogive region (2) is closed all round and has a cavity (3) and the wall thickness (9) of the ogive region (2) decreases constantly from the rear end (8) to the tip (7).
