Abstract (en)
[origin: EP2706416A1] The assembly (1) has an anchor head (2) that is designed to collaborate with an escapement wheel (20) and a fork (6) that is designed to collaborate with a balance spring (30). An angular position of the fork with respect to the head is variable. A fixing blade (10) provides only permanent mechanical connection between the head and the fork. The head comprises an arm with a bearing and stop surface, and another bearing and stop surface that comprises another arm having the fork. Independent claims are also included for the following: (1) an escapement mechanism (2) a clock element.
