Abstract (en)

[origin: WO2014037517A1] A data recording device (22) for recording communication data in a vehicle network (10) comprises a first input (24a) for receiving first communication data from a first point (18, 16) in the vehicle network (10) and a second input for receiving second communication data from a second point (18, 16) in the vehicle network (10). The data recording device (22) is designed to provide the first communication data with a first time stamp and the second communication data with a second time stamp, wherein the first time stamp and the second time stamp are synchronized with one another.
