Abstract (en)

An assembly (10) adapted for dispensing a food supplement composition (40) into a container comprising an outer cap (12) and an inner cap. Within the assembly, a food and/or food supplement product (40) is contained in powder, granule or pellet form. This product can be manually discharged after removing a seal (34) from the bottom of the outer cap (12) and applying pressure to its top surface. Typically, the discharge of the product is effected after screwing the assembly on a suitable beverage container for water or a water based product.
