Abstract (en)

[origin: EP2894392A1] Lighting device (100) for illuminating streets, roads or paths, comprising: at least one light source (220) comprising at least one light emitting diode; at least one reflector (120) comprising an essentially saddle-shaped reflection surface (150); wherein the light source (220) is arranged such that at least a part of the emitted light is directed to the reflection surface (150) of the reflector (120); and wherein the light is reflected by the reflection surface (150) in such a way that a wide light distribution of the lighting device (100) is provided at least in a direction parallel to a surface to be illuminated and perpendicular to a main axis (160) of the reflection surface (150).
