Abstract (en)

[origin: WO2015022040A1] The invention relates to a surgical set for placing an access tube (4) in the intervertebral disc of a patient, comprising a stylet (1), a cannula (2), a guiding wire (3) and an access tube (4) to be placed. In order to create access to the surgical site in a way that is easy and less stressful for the patient, the invention also provides an obturator (5) for the access tube (4), the outside diameter of which corresponds to the inside diameter of the access tube (4) and which has a lumen of a diameter that corresponds to the diameter of the guiding wire (3).
