Abstract (en)  
[origin: WO2014040654A1] The invention relates to a dental implant set (1), having: an implant (2), a granular bone substitute material (3), and a membrane (4). The aim of the invention is to provide an implant set (1) of the aforementioned type, by means of which the process of augmentation is improved. This is achieved in that the bone substitute material (3) and the membrane (4) are of a hard and solid consistency.
