Abstract (en)
[origin: WO2014060340A1] The invention relates to a device for slicing food products, in particular a high-performance slicer, comprising at least one cutting blade (10) that rotates about an axis of rotation (D) and has an imbalance (UM), in particular a sickle blade, a rotational drive (24) for the cutting blade (10), and a counterweight, which comprises at least one balancing mass (32, 34), for compensating the imbalance (UM) of the cutting blade (10).
