Abstract (en)

[origin: EP2896577A1] A supporting and stacking structure (1) for refrigerators (2) is described, comprising: a supporting base adapted to support the bottom of a refrigerator (2) and adjustable at least in a transverse direction with respect to the bottom of the refrigerator (2); a plurality of bearing and stacking elements (7) of the refrigerator (2) operatively connected to the supporting base; and a plurality of substantially vertical structural elements (5), operatively connected to the bearing and stacking elements (7) and in vertical extension with respect to the height of the refrigerator (2), wherein the bearing and stacking elements (7), when stacking many structures (1), are adapted to be placed in abutment above a corresponding structural element (5) of another structure (1) on which the stacking must be performed.
